

## SAFETY DATA SHEET 430/G150 - FARM OXIDE PROTECTIVE PAINT BLACK

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier		
Product name	430/G150 - FARM OXIDE PROTECTIVE PAINT BLACK	
Product number	430/G150/2	
1.2. Relevant identified uses of	of the substance or mixture and uses advised against	
Identified uses	Paint.	
Uses advised against	No specific uses advised against are identified.	
1.3. Details of the supplier of	the safety data sheet	
Supplier	TEAL & MACKRILL LIMITED LOCKWOOD STREET HULL HU2 0HN	
	+44(0)1482 320194(T) +44(0)1482 219266(F) info@teamac.co.uk	
Contact person	Technical Department -, 08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri, email: info@teamac.co.uk	
1.4. Emergency telephone nu	mber	
Emergency telephone	+44 (0) 1482 320194 Teamac (08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri)	
SDS No.	10599	
SECTION 2: Hazards identific	cation	
2.1. Classification of the subs	tance or mixture	
Classification (EC 1272/2008)		
Physical hazards	Flam. Liq. 3 - H226	
Health hazards	STOT SE 3 - H336	
Environmental hazards	Aquatic Chronic 3 - H412	
2.2. Label elements		
Pictogram		
Signal word	Warning	

Hazard statements	H226 Flammable liquid and vapour. H336 May cause drowsiness or dizziness. H412 Harmful to aquatic life with long lasting effects.
Precautionary statements	<ul> <li>P101 If medical advice is needed, have product container or label at hand.</li> <li>P102 Keep out of reach of children.</li> <li>P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P261 Avoid breathing vapour/ spray.</li> <li>P271 Use only outdoors or in a well-ventilated area.</li> <li>P273 Avoid release to the environment.</li> <li>P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.</li> <li>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.</li> <li>P501 Dispose of contents/ container in accordance with national regulations.</li> </ul>
Supplemental label information	EUH066 Repeated exposure may cause skin dryness or cracking.
Contains	HYDROCARBONS, C9-C11, <2% AROMATICS
Supplementary precautionary statements	P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P403+P235 Store in a well-ventilated place. Keep cool.

### 2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria.

### SECTION 3: Composition/information on ingredients

3.2. Mixtures		
HYDROCARBONS, C9-C11, <2	% AROMATICS	30-60%
CAS number: —	EC number: 919-857-5	REACH registration number: 01- 2119463258-33-XXXX

Composition comments	The product contains organic solvents	
SECTION 4: First aid measure	S	
4.1. Description of first aid mea	asures	
General information	Get medical attention immediately. Sh	ow this Safety Data Sheet to the medical personnel.
Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.	
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Skin contact	Rinse with water.	
Eye contact	Rinse immediately with plenty of wate apart. Continue to rinse for at least 10	r. Remove any contact lenses and open eyelids wide minutes.
Protection of first aiders	First aid personnel should wear appro	priate protective equipment during any rescue.
4.2. Most important symptoms	and effects, both acute and delayed	
General information		ion on health hazards. The severity of the symptoms concentration and the length of exposure.

Inhalation	Prolonged inhalation of high concentrations may damage respiratory system. During application and drying, solvent vapours will be emitted. Vapours in high concentrations are narcotic.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin contact	Prolonged contact may cause dryness of the skin. Discoloration of the skin.
Eye contact	May cause temporary eye irritation.
4.3. Indication of any immedia	te medical attention and special treatment needed
Notes for the doctor	Treat symptomatically.
SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire- extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising fro	om the substance or mixture
Specific hazards	FLAMMABLE. Solvent vapours may form explosive mixtures with air. Containers can burst violently or explode when heated, due to excessive pressure build-up.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
5.3. Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.
SECTION 6: Accidental releas	e measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Provide adequate ventilation.

#### 6.2. Environmental precautions

Environmental precautions Avoid discharge into drains or watercourses or onto the ground.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Collect spillage. Large Spillages: Absorb spillage with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13.
6.4. Reference to other section	<u>S</u>
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.
SECTION 7: Handling and stor	age
7.1. Precautions for safe handle	ing
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment.
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
7.2. Conditions for safe storage	e, including any incompatibilities
Storage precautions	Store away from incompatible materials (see Section 10). Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.
Storage class	Flammable liquid storage. The storage and use of this product is subject to the Dangerous Substances and Explosive Atmospheres Regulations (DSEAR). The requirements are given in the HSE Approved Code of Practice and Guidance, Storage of Dangerous Substances: DSEAR. Up to 250 litres of liquids with a flashpoint above 32C but below 55C may be kept in a workroom provided they are kept in closed containers in a marked, fire-resisting cupboard or bin. Larger quantities must be kept in a separate , marked storeroom conforming to the structural requirements contained in the HSE guidance note Storage of Flammable Liquids in Containers.
7.3. Specific end use(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.
Usage description	Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible.

### SECTION 8: Exposure controls/Personal protection

- 8.1. Control parameters
- Occupational exposure limits

#### **Calcium Carbonate**

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust

#### **TRIZINC BIS(ORTHOPHOSPHATE)**

Long-term exposure limit (8-hour TWA): 10 mg/m<sup>3</sup>

#### Xylene isomer mixture (self classification)

Long-term exposure limit (8-hour TWA): WEL 50 ppm 220 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 100 ppm 441 mg/m<sup>3</sup> Sk

#### HYDROCARBONS, C9, AROMATICS

Long-term exposure limit (8-hour TWA): WEL 19 ppm 100 mg/m<sup>3</sup> vapour

#### PHTHALIC ANHYDRIDE

Long-term exposure limit (8-hour TWA): WEL 4 mg/m3(Sen) Short-term exposure limit (15-minute): WEL 12 mg/m3(Sen)

#### **Dipropylene Glycol Methyl Ether**

Long-term exposure limit (8-hour TWA): WEL 50 ppm 308 mg/m<sup>3</sup> Sk

WEL = Workplace Exposure Limit Sk = Can be absorbed through skin. Sk = Can be absorbed through the skin.

#### HYDROCARBONS, C9-C11, <2% AROMATICS

DNEL	Consumer - Oral; Long term systemic effects: 300 mg/kg/day Industry - Inhalation; Long term systemic effects: 1500 mg/m³ Industry - Dermal; Long term systemic effects: 300 mg/kg/day Consumer - Dermal; Long term systemic effects: 300 mg/kg/day Consumer - Inhalation; Long term systemic effects: 900 mg/m³
PNEC	No PNEC available. Substance is a hydrocarbon UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for the risk assessment of this complex substance.
	TRIZINC BIS(ORTHOPHOSPHATE) (CAS: 7779-90-0)

DNEL	Industry - Dermal; Long term : 65 mg/kg/day Industry - Inhalation; Long term : 310 mg/m³ Consumer - Dermal; Long term : 15 mg/kg/day Consumer - Inhalation; Long term : 37.2 mg/m³ Consumer - Oral; Long term : 1.67 mg/kg/day
PNEC	Fresh water; 19 mg/l marine water; 1.9 mg/l STP; 4168 mg/l Sediment (Freshwater); 70.2 mg/kg Sediment (Marinewater); 7.02 mg/kg Soil; 2.74 mg/kg Intermittent release; 19 mg/l
ure controls	

8.2. Exposure controls

Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.
Hand protection	To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturer's performance data suggest that the optimum glove for use should be: Wear protective gloves made of the following material: Nitrile rubber. Thickness: ≥ 0.31 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.
Other skin and body protection	Wear appropriate clothing to prevent repeated or prolonged skin contact.
Hygiene measures	Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Wash contaminated clothing before reuse.
Respiratory protection	Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. Wear a respirator fitted with the following cartridge: Gas filter, type A2.
Environmental exposure controls	Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties		
Appearance	Viscous liquid. Coloured liquid.	
Colour	Black.	
Odour	Organic solvents.	
Odour threshold	Not determined.	
рН	Technically not feasible.	
Melting point	Not determined.	

Initial boiling point and range	Not determined.
Flash point	38 approx.°C Closed cup.
Evaporation rate	Not determined.
Evaporation factor	Not determined.
Upper/lower flammability or explosive limits	: 0.8%
Other flammability	Not determined.
Vapour pressure	Not determined.
Vapour density	heavier than air
Relative density	1.o1 approx. @ @20°C
Solubility(ies)	Insoluble in water
Partition coefficient	Not determined.
Auto-ignition temperature	Not determined.
Decomposition Temperature	Not determined.
Viscosity	4.5 P @ 25°C
Explosive properties	Not determined.
Explosive under the influence of a flame	Not considered to be explosive.
Oxidising properties	Not determined.
9.2. Other information	
Volatile organic compound	This product contains a maximum VOC content of <500 g/litre.
SECTION 10: Stability and rea	ictivity
10.1. Reactivity	
Reactivity	See the other subsections of this section for further details.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
10.3. Possibility of hazardous	reactions
Possibility of hazardous reactions	The following materials may react strongly with the product: Oxidising agents.
10.4. Conditions to avoid	
Conditions to avoid	Avoid heat, flames and other sources of ignition. Containers can burst violently or explode when heated, due to excessive pressure build-up. Static electricity and formation of sparks must be prevented.
10.5. Incompatible materials	
Materials to avoid	Oxidising materials. Acids - oxidising.

Hazardous decomposition<br/>productsDoes not decompose when used and stored as recommended. Thermal decomposition or<br/>combustion products may include the following substances: Harmful gases or vapours.

SECTION 11: Toxicological information		
11.1. Information on toxicological effects		
Toxicological effects	There is no data available on the mixture itself. The mixture has been assessed following the EC 1272/2008 regulation and classified for toxicological hazards accordingly. See Sections 2 and 3 for details.	
Carcinogenicity		
IARC carcinogenicity	None of the ingredients are listed or exempt.	
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system. During application and drying, solvent vapours will be emitted. In high concentrations, vapours are narcotic and may cause headache, fatigue, dizziness and nausea.	
Ingestion	Symptoms following overexposure may include the following: Nausea, vomiting. Diarrhoea.	
Skin contact	The product contains organic solvents. May be absorbed through the skin. Acts as a defatting agent on skin. May cause cracking of skin, and eczema.	
Eye contact	May cause temporary eye irritation.	
Medical considerations	Skin disorders and allergies. Avoid vomiting and stomach flushing because of the risk of aspiration.

Carcinogenicity	
Carcinogenicity	There is no evidence that the product can cause cancer.
Reproductive to	xicity
Reproductive to fertility	<b>xicity -</b> This substance has no evidence of toxicity to reproduction.
Specific target of	rgan toxicity - single exposure
STOT - single e	<b>xposure</b> Not classified as a specific target organ toxicant after a single exposure.
Specific target of	rgan toxicity - repeated exposure
STOT - repeate	<b>d exposure</b> Not classified as a specific target organ toxicant after repeated exposure.
General informa	tion No specific health hazards known.
SECTION 12: Ecological info	rmation

There is no data available on the mixture itself. The mixture has been assessed following the EC 1272/2008 regulation and classified for toxicological hazards accordingly.

### 12.1. Toxicity

Ecotoxicity

Ecological information on ingredients.

### HYDROCARBONS, C9-C11, <2% AROMATICS

Acute aquatic toxicity	
Acute toxicity - fish	LC50, > 96 hours: 1000 mg/l, Oncorhynchus mykiss (Rainbow trout) Substance did not cause acute toxicity to fish
Acute toxicity - aquatic invertebrates	Substance did not cause acute toxicity to the freshwater invertebrates $EC_{50}$ , 48 hours: >1000 mg/l, Daphnia magna
Acute toxicity - aquatic plants	$EC_{50}$ , > 72 hours: 1000 mg/l, Freshwater algae Substance did not cause acute toxicity to the freshwater green algae
Acute toxicity - microorganisms	EC₅₀, >: 100 mg/l, Activated sludge
Chronic aquatic toxicity	
Chronic toxicity - fish early life stage	NOEC, 28 days: 0.131 mg/l, Oncorhynchus mykiss (Rainbow trout)
Chronic toxicity - aquatic invertebrates	NOEC, 28 days: 0.23 mg/l, Daphnia magna

Revision date: 18/07/2019

# 430/G150 - FARM OXIDE PROTECTIVE PAINT BLACK

### TRIZINC BIS(ORTHOPHOSPHATE)

	Acute aquatic toxicity	
	LE(C)50	$0.1 < L(E)C50 \le 1$
	M factor (Acute)	1
	Acute toxicity - fish	LC₅₀, 96 hours: Oncorhynchus mykiss 0.14 - 0.26 Zn2+ mg/l, Fish
	Acute toxicity - aquatic invertebrates	EC₅₀, 48 hours: Daphnia magna 0.04 - 0.86 Zn2+ mg/l, Daphnia magna
	Acute toxicity - aquatic plants	EC₅₀, 72 hours: 0.136 - 0.15 Zn2+ mg/l, Selenastrum capricornutum IC₅₀, 72 hours: Desmodesmus subspicatus <0.3 mg/l, Algae
	Chronic aquatic toxicity	
	NOEC	0.01 < NOEC ≤ 0.1
	Degradability	Non-rapidly degradable
	M factor (Chronic)	1
12.2. Persis	tence and degradability	
Persistence and degradability There are no data on the degradability of this product.		
Ecological in	nformation on ingredients.	
		HYDROCARBONS, C9-C11, <2% AROMATICS
	Persistence and degradability	The product is readily biodegradable.
	Phototransformation	Oxidises rapidly by photo-chemical reactions in air
	Biodegradation	- 80 Degradation (%): 28 days Test - 301F Ready Biodegradability - Manometric Respiratory Test
12.3. Bioac	cumulative potential	
Bioaccumul	ative potential No dat	a available on bioaccumulation.
Partition co	efficient Not de	termined.
Ecological i	nformation on ingredients.	
		HYDROCARBONS, C9-C11, <2% AROMATICS
	Bioaccumulative potentia	The product contains potentially bioaccumulating substances.
	Partition coefficient	log Pow: 5 - 6.7
		TRIZINC BIS(ORTHOPHOSPHATE)
	Bioaccumulative potentia	The product is not bioaccumulating.
12.4. Mobili	ty in soil	
Mobility	Volatil surfac	e liquid. The product contains organic solvents which will evaporate easily from all es.
Ecological i	nformation on ingredients.	
		HYDROCARBONS, C9-C11, <2% AROMATICS

Mobility		The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces. Readily absorbed into soil.	
Adsorption/desor coefficient	rption	Not available.	
Surface tension		24.5 mN/m @ 20°C	
12.5. Results of PBT and vPvl	B assessm	ent	
Results of PBT and vPvB assessment	This proc	duct does not contain any substances classified as PBT or vPvB.	
Ecological information on ingr	Ecological information on ingredients.		
		HYDROCARBONS, C9-C11, <2% AROMATICS	
Results of PBT a assessment	ind vPvB	This substance is not classified as PBT or vPvB according to current EU criteria.	
		TRIZINC BIS(ORTHOPHOSPHATE)	
Results of PBT a assessment	ind vPvB	This substance is not classified as PBT or vPvB according to current EU criteria.	
12.6. Other adverse effects			
Other adverse effects	None kno	own.	
Ecological information on ingr	edients.		
		HYDROCARBONS, C9-C11, <2% AROMATICS	
Other adverse effects Not known.			
		TRIZINC BIS(ORTHOPHOSPHATE)	
Other adverse ef	ffects	Not available.	
SECTION 13: Disposal consid	lerations		
13.1. Waste treatment method	ls		
General information	products way. Dis comply w any local handling containe	eration of waste should be minimised or avoided wherever possible. Reuse or recycle wherever possible. This material and its container must be disposed of in a safe posal of this product, process solutions, residues and by-products should at all times with the requirements of environmental protection and waste disposal legislation and authority requirements. When handling waste, the safety precautions applying to of the product should be considered. Care should be taken when handling emptied rs that have not been thoroughly cleaned or rinsed out. Empty containers or liners in some product residues and hence be potentially hazardous.	
Disposal methods	licensed clothes a labelled y	mpty into drains. Dispose of surplus products and those that cannot be recycled via a waste disposal contractor. Waste, residues, empty containers, discarded work ind contaminated cleaning materials should be collected in designated containers, with their contents. Waste packaging should be collected for reuse or recycling. ion or landfill should only be considered when recycling is not feasible.	

Waste class	When this coating, in its liquid state, as supplied, becomes a waste, it is categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing dried residues of the supplied coating, are categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). If mixed with other wastes, the above waste code may not be applicable. Used containers, drained and/or rigorously scraped out and containing dry residues of the supplied coating, are categorised as non-hazardous waste, with code 15 01 02 (plastic packaging) or 15 01 04 (metal packaging).	
SECTION 14: Transport inform	nation	
General	For limited quantity packaging/limited load information, consult the relevant modal documentation using the data shown in this section.	
14.1. UN number		
UN No. (ADR/RID)	1263	
UN No. (IMDG)	1263	
UN No. (ICAO)	1263	
14.2. UN proper shipping name	9	
Proper shipping name (ADR/RID)	PAINT, Contains Low Aromatic White Spirit, Class 3, PG III, (38 °C c.c.)	
Proper shipping name (IMDG)	PAINT	
Proper shipping name (ICAO)	PAINT	
14.3. Transport hazard class(e	<u>s)</u>	
ADR/RID class	3	
IMDG class	3	
Transport labels		
14.4. Packing group		
ADR/RID packing group	III	
IMDG packing group	III	
ICAO packing group	III	
14.5. Environmental hazards		
Environmentally hazardous substance/marine pollutant No.		
14.6. Special precautions for u	ser	
Always transport in closed con	toinare that are upright and secure. Ensure that persons transporting the product know what to	

Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Tunnel restriction code (D/E)

### 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

### Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

#### SECTION 15: Regulatory information

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU legislation

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18
December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).
Commission Regulation (EU) No 2015/830 of 28 May 2015.
Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
December 2008 on classification, labelling and packaging of substances and mixtures (as amended).

#### 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

#### Inventories

#### **EU - EINECS/ELINCS**

None of the ingredients are listed or exempt.

#### SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.
	ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.
	RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.
	IATA: International Air Transport Association.
	ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.
	IMDG: International Maritime Dangerous Goods.
	CAS: Chemical Abstracts Service.
	ATE: Acute Toxicity Estimate.
	$LC_{50}$ : Lethal Concentration to 50 % of a test population.
	$LD_{50}$ : Lethal Dose to 50% of a test population (Median Lethal Dose).
	EC <sub>50</sub> : 50% of maximal Effective Concentration.
	PBT: Persistent, Bioaccumulative and Toxic substance.
	vPvB: Very Persistent and Very Bioaccumulative.
Classification abbreviations	Acute Tox. = Acute toxicity
and acronyms	Aquatic Acute = Hazardous to the aquatic environment (acute)
	Aquatic Chronic = Hazardous to the aquatic environment (chronic)
	Asp. Tox. = Aspiration hazard
	Flam. Liq. = Flammable liquid
	STOT RE = Specific target organ toxicity-repeated exposure
	STOT SE = Specific target organ toxicity-single exposure
Classification procedures according to Regulation (EC)	STOT SE 3 - H336, STOT RE 1 - H372: Calculation method. Aquatic Chronic 3 - H412: Calculation method. Flam. Liq. 3 - H226: Expert judgement.
1272/2008	
Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.

Revision comments	Issued in new format for Reach compliance in accordance with EC 1272/2008 Issued in accordance with Annex II to REACH, as amended by Commission Regulation (EU) No. 2015/830 Revision to sections 2, 8, 11 & 12 for reclassification of solvents.
Issued by	Technical Dept. (P.E.)
Revision date	18/07/2019
Revision	8.0
Supersedes date	05/04/2018
SDS number	10599
SDS status	Approved.
